Event Streams Workshop

Our Integration Modernization Event Streams Workshop pairs you with our integration architects to explore industry trends around modernizing integration workloads to improve resilience, scalability and agility. During the workshop, we work with you to understand your current integration landscape, business drivers and pain points; identify areas of improvement and introduce a plan for next steps.

Workshop Goals

Design a future state for integration strategies that deliver a range of relevant business benefits:

- Reduced time-to-value
- Reduced effort
- Happier, more productive teams

Take Away ...

Executive summary of workshop findings

- Key business drivers and pain points
- AS-IS integration landscape for Event Streams
