

QUICK FHIR

for CMS-9115-F Mandate Compliance

BRING EXISTING HEALTHCARE SYSTEMS INTO COMPLIANCE WITH THIS IMPORTANT FHIR® MANDATE

FHIR®-ENABLE EXISTING SYSTEMS

CMS-9115-F requires making existing Electronic Health Information available via FHIR®

VISION TO VALUE: FASTER

Unlike software-centric offerings, Prolifics delivers an **in-Production** solution that you own

FLEXIBLE DEPLOYMENT OPTIONS

Cloud-ready. In your data center, on any cloud, hybrid model, or let us run it as a Managed Service

INDUSTRY EXPERTISE

Over 25 years of Healthcare experience makes Prolifics the perfect FHIR® solution partner

Healthcare On FHIR®

US Federal Government Health & Human Services mandates to drive open access to data across the healthcare ecosystem are making HL7's FHIR® mandatory for healthcare data interchange in 2021 and beyond.

These mandates lay the groundwork for FHIR® as the *new normal* for virtually all healthcare data interchange. FHIR® delivers a modern, secure, real-time, and open foundation for healthcare data interchange in the 21st Century.

FHIR®-based digital healthcare solutions will drive better patient care, increase provider impact on patient outcomes, and decreased healthcare costs in this new age of value-based care.

Example Quick FHIR Use Cases

- ▶ *ONC/CMS 21st Century Cures Final Rule compliance for patient access to Payer healthcare data, porting of healthcare data between Payers, and inter-Provider notification of patient Admissions, Discharges, and Transfers*
- ▶ *Claims processing optimization and cost reduction by applying Data Governance, Data Cleansing, and AI/ML insights to FHIR® & EDI Claim processing*
- ▶ *Analysis of real-time FHIR® data in-flight for condition/claims/fraud detection & trending*
- ▶ *Clinical pathway and care plan optimization*
- ▶ *And much more!*

Accelerate Your FHIR® Strategy

FHIR® implementations can be extremely challenging. With 100+ APIs and dozens of Resources, even tech-savvy healthcare businesses can struggle with making sense of the complexities of FHIR®.

While EHR & Claims system vendors will be FHIR®-enabling their systems to meet near-term regulatory requirements, be sure that those solutions are looking out for **you** and **your** business requirements, not their own financial interests. Prolifics **Quick FHIR**, a vendor-neutral FHIR® Data & Integration solution, is tailored to you and ensures that **your** business needs always come first.

A single Quick FHIR deployment can function for any number of backend Electronic Health Information systems, which is particularly cost effective for those who have multiple backend EMR/Claims systems.

Don't Build a FHIR® Implementation. Adopt One.

Prolifics **Quick FHIR** is built on an open Cloud-ready technology stack to deliver FHIR® capabilities precisely where you need them. The solution is easily migrate-able between on-premises, cloud, and hybrid deployment models. Being Cloud-ready, it scales linearly as your needs grow.

Have existing technology investments that you'd like to leverage? **Quick FHIR** is an open modular solution in which our consultants can swap in any incumbent infrastructure or technology preference. Every **Quick FHIR** deployment is tailored to your exact needs.

Insight, Execution, and Support

With Prolifics Quick FHIR, you can:

- ▶ Add a 21st Century Cures Act ONC/CMS Final Rule compliant solution onto virtually any existing Electronic Health Information or Claims Processing system.
- ▶ Provide FHIR[®] access to your EHI/Claims systems securely onto the Internet without relying on VANs or incurring expensive "per-transaction" costs typical in alternative solutions based on outdated EDI technology.
- ▶ Utilize Data Governance, Data Cleansing, and AI/Machine Learning to add value to data being moved by FHIR[®]. Automatically correct erroneous or malformed data to dramatically reduce the cost of dealing with Data Quality exceptions.
- ▶ Audit end-to-end FHIR[®] data flows to augment defense against potential Information Blocking complaints.
- ▶ **Save time and costs** by leveraging Prolifics' FHIR[®] expertise and pre-built solution components.

The Quick FHIR Customer Journey

Start your FHIR[®] journey with a no-cost Prolifics Quick FHIR Discovery Workshop that helps you understand how Quick FHIR can address your CMS-9115-F requirements as well as strategic FHIR[®] needs and business goals.

From there, our FHIR[®] integration and data consultants will map out **Quick FHIR** deployment scenarios to show how you can get started. If Quick FHIR looks right for you, our experts can build Quick Start Pilots or full implementations that show Quick FHIR running with your existing systems. Finally, we can operationalize those implementations, scaling them up for your production FHIR[®] needs.

Prolifics: Partners in FHIR[®]

With over 25 years in the healthcare industry and over 40 years in the Integration and Data spaces, Prolifics has the expertise and vision to help your organization chart a future with FHIR[®].

Contact us at solutions@prolifics.com to learn more about our Quick FHIR solution.

Prolifics Quick FHIR supports leading FHIR[®] efforts, including:

- ▶ *HL7's FHIR Accelerator projects*
 - ▶ *CMS' Blue Button API*
 - ▶ *IBM Watson Health FHIR[®] Server*
 - ▶ *HAPI & Smile CDR FHIR[®] Servers*
